

## eZtrend® QXe

## Specification

X SERIES - ADVANCED GRAPHIC RECORDER

43-TV-03-12

October 2006

### Crystal Clear Display

- 5" Digital Colour LCD (TFT)
- QVGA Resolution (320 x 240 pixels)
- Clear and intuitive operation
- Industrial rugged Touch Screen with rapid navigation

### Comprehensive Connectivity

- 10/100 Ethernet (DHCP), OPC Server Web and E-mail
- FTP and TCP/IP
- RS485 Modbus Protocol (option)
- Front USB port as standard for keyboard and mouse. Rear USB option.

### Data Storage

- On-board non-volatile memory - up to 400MB
- Removable USB storage
- No moving parts - all solid state Flash memory

### Security Stringent - Total Data integrity

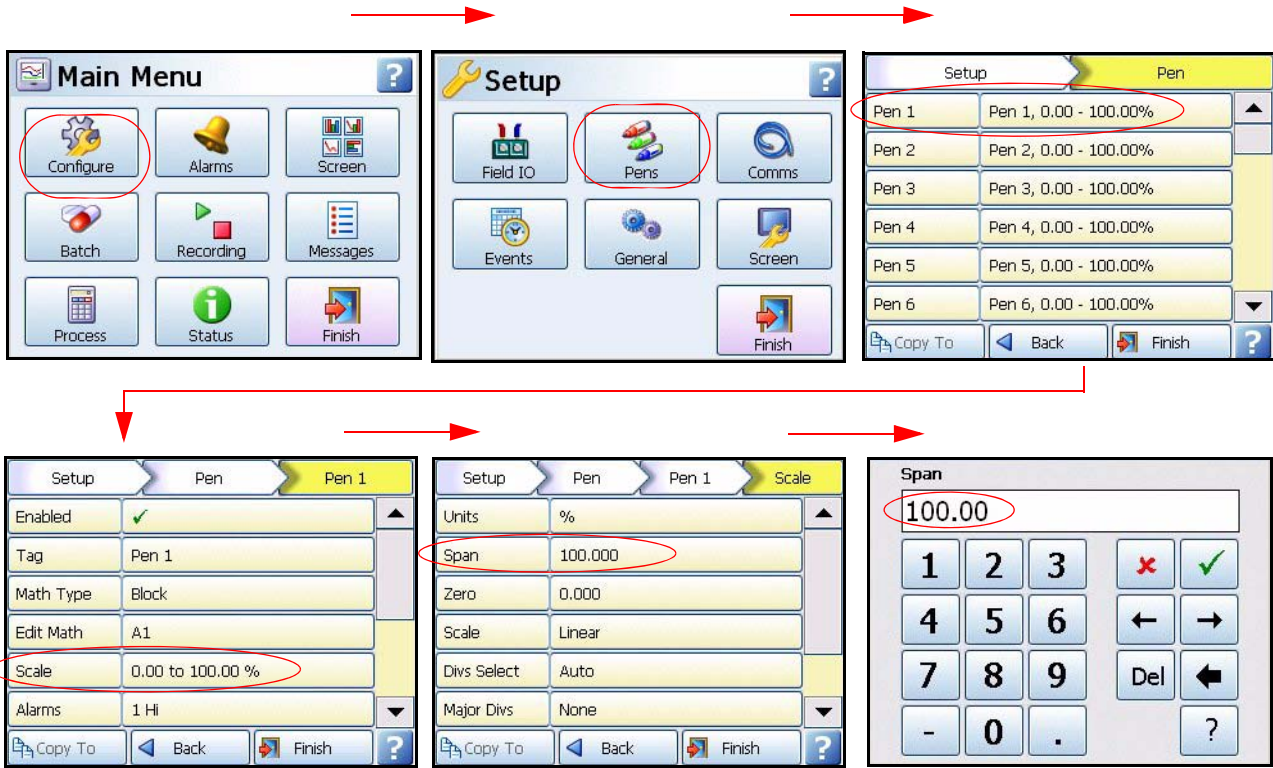

- Password Protection - 21CFR Part 11
- ESS - Extended Security System

### Plus..

- Health Watch for preventative maintenance
- Remote Access - Advanced Software Data Analysis at your PC
- Independent Chart and Logging speeds
- Global Language Support
- Rapid review and replay of data at recorder
- Approvals - CE, CSA, UL
- NEMA 4X / IP66 option
- Up to 10Hz (100 msec) Logging (including expansion card option)
- Up to 12 Analogue Inputs
- Remote Viewing Tool
- 4 Pulse Inputs via the Digital I/O card (option)

# Recorder Function

- Honeywell's eZtrend QXe recorder provides flexible electronic data acquisition and recording in a DIN standard 144mm format recorder.
- Up to 12 Analogue inputs with at least 70MB standard on-board memory plus additional removable storage media.
- The eZtrend QXe uses a digital colour TFT LCD screen to provide easy to read displays with wide viewing angles for the best all around data viewing.
- The touch screen operator interface provides fast, easy access to the recorder menus making set up and data analysis quick and efficient. Navigation through the menus and text entry are direct and intuitive.

Example of a recorder menu path from the Main Menu to Pen Scale configuration with clear and rapid navigation

## Features

### Display

- **5" Colour Active TFT** - with more than 256,000 colours makes it easy to interpret process data and take action with the intuitive bar charts, digital values or trends displays. A screen saver function can be set from 1 to 720 minutes to extend the life of the backlight.
- **Touch Screen** - the heavy duty durable touch screen provides easy data entry and rapid navigation through the menus.
- **Help Files** - A complete contextual help system can be accessed and visualised on the screen of the recorder.

### Communications

- **Ethernet Connectivity** - the Ethernet (DHCP standard) connection, with support for various protocols, provides unlimited connectivity to local area networks (LANs). The standard Ethernet interface makes networking of the recorder to a LAN or the world wide web fast and convenient. Dynamic Host Configuration Protocol (DHCP) automatically acquires the settings (IP address) for network communications from a DHCP server.
- **Simple Network Time Protocol (SNTP)** - The recorder can be synchronised over the ethernet network via a SNTP client or synchronise other recorders via a Server.
- **Web Server** - with the recorder connected to a LAN, all process variables, alarm and messages can be viewed from an internet browser; values are automatically refreshed.

## Data Storage

**Internal Data Storage** - 70MB to 400MB of expandable internal non-volatile flash memory is available for data storage and chart history.

Internal memory / Logging rate = 1 sec		
Pens	70MB	400MB
6	32days	182d
12	16d	91d
24	8d	45d

**Data Export** - Removable USB flash storage device. Data is stored in a secure binary encrypted format, with the recorder's configurations, providing added security of the data files.

Removable USB flash storage devices

## External USB Devices

- The recorder has two USB host ports, one at the front (standard) and one at the rear available on the Communications card (option). This is for attaching external USB devices such as a keyboard, mouse or a USB data storage key. The keyboard and mouse can be used to navigate the recorder's screen and enter text.

## Remote Viewer

- Extends the user interface of the recorder onto the desktop PC. Providing remote viewing of the unit launched from a web browser. Full remote control is available as an option. Compatible with Microsoft™ Internet explorer 6 and higher.

## Security

- **Total Data Integrity** - data is stored in secure encrypted files making it easy to retrieve the data dependent on process information. Data is automatically recognised without having to remember file names.
- **Password Protection** - Up to 4 levels of password protection with up to 50 different users are available. Multiple levels of password protection and an audit trail of actions enhance the security of the data.
- **Extended Security System (option)** - ESS provides extended features including entry of unique User ID's and associated passwords, time-out of password entry, password expiration, and traceability of user actions. ESS is compatible with the requirements of 21CFR part 11.

## Events

- Certain conditions or operations can be set up and logged according to the time and date of the occurrence. Subsequently events can be reviewed in a list or represented on a graph.

## Batch

- Batch enhances the management of data collected in non-continuous process, known as batch processing, used in thermal treatment, sterilisation, food processing and chemical reactions.

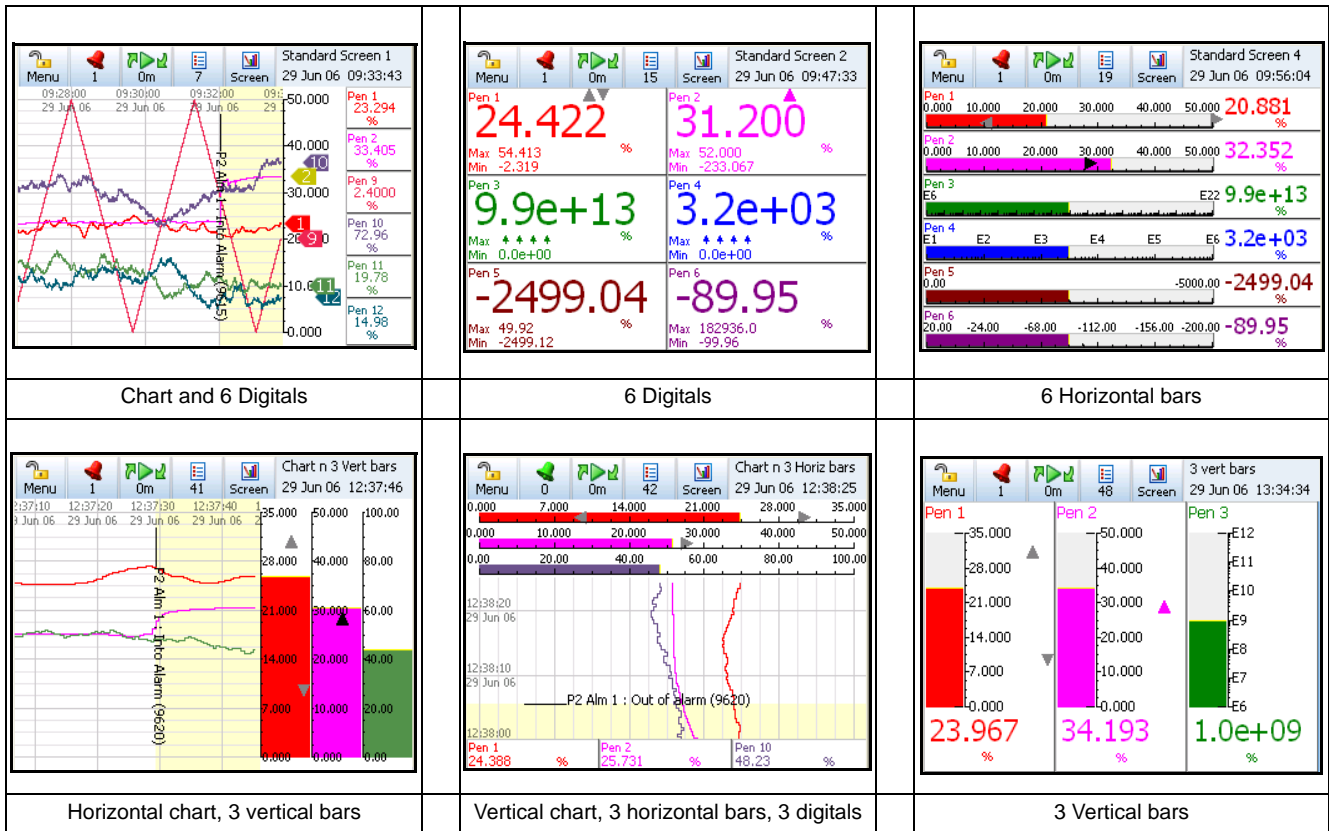

## Other Standard features ..

- **CE Mark** - Conformity with 73/23/EEC, Low Voltage Directive and 89/336/EEC EMC Directive.
- **Soft Alarms** - 6 "software" alarms per pen are easily set up to display and record selected out-of-limit conditions. These can be tied to the relay or digital outputs to activate the user's external equipment.
- **Communications** - the recorder supports FTP, Modbus TCP/IP (slave mode), web and email over Ethernet (DHCP standard) communications port and Modbus RTU (slave mode) via an RS485 port (option). USB ports allow the use of an ASCII barcode reader. Email sent to your network connected PC triggered by an Alarm or an Event.
- **Independent Display Chart Speeds and Logging rates** - logging rates can be programmed completely separate from the chart display speed, allowing the data to be displayed and stored at the rates that best suits the application.
- **Language Support** - standard language prompts for English UK & US, French, German, Italian, Spanish, Brazilian, Polish, Hungarian, Slovakian, Czech, Turkish, Romanian, Russian and Portuguese.
- **Logarithmic Scales** - all displayed scales can be set as linear or logarithmic.
- **Enclosure rating** - standard NEMA 3 / IP54 type front face protection. NEMA 4X / IP66 available as an option.
- **Pulse Inputs** - The 8 Digital I/O option card has 4 channels that can be set as pulse inputs (first 4 channels). The operating frequency for pulse inputs on the Digital I/O card is 1kHz max.

- **Fuzzy Logging** - this standard feature provides a unique method to increase the storage capacity of the recorder. The data is monitored to determine changes in process data; if no changes are observed data is logged periodically. If data is changing rapidly, it is recorded normally at the programmed rate. By not logging data that is static, data compression of up to 100:1 or more can be achieved saving valuable memory.
- **Security tag** - “wire seal provision” that provides added security to seal the front door and rear wiring when using optional rear cover to prevent undetected entry to these areas of the recorder.
- **USB Ports** - Front and rear USB host ports for data and setup transfers or remote screen through this port. Front USB port is standard and the rear USB port is available with the Communications card option. Use these ports to attach external devices (keyboard or mouse), for direct interfacing with the recorder.
- **Replay with Zoom** - Select replay mode and zoom-in on a specific area on the screen. The data can easily be replayed at the recorder with the ability to “zoom”. The touch screen makes it fast to review and analyse historical data. A “jump” function allows you to go from any message list directly to the trend showing the occurrence of the alarm.

## eZtrend QXe Standard Screens

Up to 10 screens displaying multiple combinations of Charts, Bars and Digitals can be configured, 6 examples below.

## Options - Hardware

- **Alarm Card** - 4 or 8 outputs relay contacts SPCO 240V, 8 Digital I/O - SPNO 24VDC. Programmable alarm set points can be configured to activate up to 8 outputs.
- **RS485 Modbus** - the RS485 connection allows process data to be transferred to other devices, or to record data received in MODBUS RTU protocol (slave mode only).
- **Portable Recorders** - Portable cases available as an accessory item.
- **Digital Input** - Two digital input options are available: 2 inputs on 8 channel Alarm card, 8 inputs on Digital I/O card. The digital inputs allow users to initiate, from a remote location via a dry contact closure, selected recorder functions.
- **Approvals** - CSA and UL
- **24VAC/DC Power Supply** - 20 to 30VDC / 20 to 25VAC
- **24VDC Transmitter Power Supply** - can supply up to 130mA to external transmitters.
- **Print Support** - Network printing from status, message and replay screens. Plus screen capture facility of process screens instantly using a basic USB standard PCL printer.

# Firmware Credit System

The credits system is a flexible way of adding to the recorder features without having to upgrade the firmware. Simply purchase a number of credits to cover your current and possibly future requirements and the recorder will be delivered with the credits loaded. The credit value in each recorder is displayed in the Factory menu. Select the Options button and by activating and de-activating the options in the credit list, the recorder will change its functionality. Any greyed out options on the list will mean there are not enough credits available for that feature on the recorder.

Credits can be applied as desired to the Firmware functions until the total number of credits purchased has been used up. Additional credits can be purchased later if new features are to be activated and not enough credits are available to support these additional functions.

On Table V of the [“Model Selection Guide” on page 13](#) select what firmware credits are required. Details of each firmware option are listed here in [Table 1 Firmware Options](#).

**Table 1: Firmware Options**

Firmware option	Credit value	Description
<b>Full Maths</b>	<b>4</b>	Full Maths - this can handle math expressions that can consist of expressions up to 100-characters in length. (Note 1)
<b>Events</b>	<b>6</b>	Events are certain conditions or operations that can be set up and logged according to the time and date of an occurrence. Subsequently events can be reviewed or displayed on a graph. Events can be set up to produce the following actions: Mark on Chart, start/stop Logging, start/stop/reset Totalisers, acknowledge alarm, trigger an Event, set/clear Relay, Screen change, E-mail a message and Reset max/mins. (Note 2)
<b>Totalisers/ Sterilisation calculation</b>	<b>4</b>	Each pen can be associated with a totaliser. Using extra pens, the totalised values can be displayed and recorded; multiple totals can be calculated out of the same variable (weekly, monthly, etc.). The totaliser function can handle Fo and Po sterilisation calculation. (Note 1)
<b>Health Watch/ Maintenance</b>	<b>2</b>	The recorder keeps track of important “life actions” for improved diagnostics and preventative maintenance notification. Including Powered On, Last powered On, Time On since power up, Total On time, Total Off time, Longest Off time, Lithium cell life, Backlight life left at 100% brightness, Hi/Lo CJC value (Hi & Lo temps), Analogue In last factory/user cal, Relay operations.
<b>Print Support</b>	<b>2</b>	Network printing from status, message and replay screens. Plus screen capture facility of process screens instantly using a basic USB standard PCL printer.
<b>Batch</b>	<b>3</b>	The Batch function allows the user to segment portions of data for further analysis. Batch controls include Start, Stop, Pause, for viewing, Resume and Abort.
<b>Groups</b>	<b>2</b>	Groups of Pens can be specified and named with a Group number to display on the recorder.
<b>Remote Viewer</b>	<b>3</b>	Extends the user interface of the recorder onto the desktop PC. Providing full remote control of the unit launched from a web browser.
<b>Email</b>	<b>3</b>	Setup email accounts to send the following: When an Alarm is triggered or an Email can be sent as a part of an Event occurring, such as: Alarms - In/Out/Ack, Totaliser – Start, Stop or Reset, Digital Inputs – On, Off or State change, TC Burnout – on a specific Analogue Input channel, Scheduled Events – Once, Interval, Specific days, Month End.
<b>OPC Server</b>	<b>8</b>	OPC (OLE for process Control) - Software application for realtime interfacing between servers and clients. OPC is a software standard that defines common interfaces for data exchange between devices such as recorders, controllers, PLC's and Windows based applications
<b>Extra Pens</b>	<b>2</b>	4 extra pens to store and display totalised values, results of calculations, etc. Maximum is up to 12 extra pens for the <b>QXe</b> recorder.

## Notes

(1) Additional pens (“Extra Pens”) can be used to display and store the results of calculations, totalisers, variables imported via communications, or to store values.

(2) Event markers are required to automatically reset the totalisers, for example on a periodic basis or on an external condition. (Not necessary if the totalisers are reset manually)

# The TrendManager Software Suite

The TrendManager Pro Software Suite complements the capabilities of the “X Series” recorders by providing the benefits of viewing, configuration, network communications, database management, data analysis and report generation using a personal computer. It ties the process together, providing for real-time or FTP communications with the recorders through a Local Area Network (LAN).

## TrendViewer

TrendViewer - is the standard software provided with the recorder that displays and prints data imported from the storage media used by the recorder.

## TrendManager Pro

TrendManager Pro is an advanced data analysis/archiving software package, providing full configuration of the recorders. TrendManager Pro is a stand-alone package that delivers to the user total recorder configuration, allowing the user to archive, graph, print and export data. TMP also allows files to be exported using comma separated variables (CSV) format, that can be imported in most computer software.

## TrendServer Pro

TrendServer Pro is a fully network aware software package for real-time viewing and archiving of data with communications to the recorder. It supports all the capabilities of TrendManager Pro plus real-time data acquisition FTP (File Transfer Protocol) and web browser access. TrendServer Pro provides secure multi-level, multi-user access to the recorder data by various departments with security. Standard features of TrendServer Pro include data archive tools E-mail set up and alarming, graphing, print, import and export data facilities.

**TrendServer Pro with OPC Server** - provides the same functions as the TrendServer Pro tools, but includes the added function of an integrated OPC Server to allow easy interfacing to third party HMI software packages that support an OPC Client. This provides a real-time interface between servers and clients.

## Communications Server

The Communication Server is supplied with TrendServer Pro. It manages real-time communications, distributed access to the stored data, time synchronisation over RS-485 and Ethernet networks. It is also available with a V2 compliant OPC Server to make it easier to interface third party HMI software packages that support an OPC Client. The Communication Server provides security for the transmission and storage of process data.

## Database Management Tool

**Database Management Tool** - this software application works with TrendManager Pro and TrendServer Pro to provide safe administration of data with tools to archive, sort, move, copy and delete the data stored in local and remote databases.

The Database Management Tool software is supplied with TrendServer Pro.

Minimum System requirements for TrendViewer, TrendManager Pro:-	Minimum System requirements for TrendServer Pro:
1GHz Pentium processor or higher	1GHz Pentium processor or higher
CD-ROM drive	CD-ROM drive
Monitor screen resolution 1024 x 768 recommended minimum, high colour	Monitor screen resolution 1024 x 768 recommended minimum, high colour
Windows™ 2000, XP	Windows™ 2000, XP
512 Mbyte of RAM (min 512 Mbyte recommended)	512 Mbyte of RAM (min 512 Mbyte recommended)
16 bit colour graphics, 24 bit recommended	TCP IP installed
50 Mbyte free hard disk space	2 Gbyte Hard-drive free disk space
A mouse	A mouse
Flash card reader or USB port	Flash card reader or USB port

Specification	Design Attributes
<b>Digital indicators and Display</b>	<p><i>Display size and Type:</i> 5" diagonal, Digital Colour LCD (TFT) with Touch Screen Industrial grade with brightness adjustment and wide viewing angle</p> <p><i>Resolution:</i> QVGA (320 x 240 pixels).</p> <p><i>Screen Saver:</i> Set in minutes from 1 to 720, can be set to dim the screen or to switch off. Automatic wake-up facility in the case of an alarm.</p> <p><i>Brightness adjustment:</i> Adjustable between 10 and 100%, default set to 80% brightness.</p> <p><i>Backlight life time:</i> 40,000 hours to half brightness when used at 100% (62,500hr if used at 80%). Maximum luminosity 450 cd/m<sup>2</sup>.</p> <p><i>Touch Screen life:</i> 1,000,000 touches</p>
<b>Display Update Rate</b>	Display values updated every second
<b>Status Display</b>	A status bar, at the top of the recorder's screen, displays the real-time icons of the recorder status, such as recording time left and alarm active.
<b>Communications</b>	Ethernet 10/100 base - T with RJ45 connector supporting Modbus/TCP, FTP, Internet, DHCP or fixed IP address. RS485 Modbus RTU (up to 115200 Baud Rate). RS485 port is available as an option on the Comms card.
<b>Mathematics</b>	Basic maths include Add, Subtract, Multiply, Divide, Modulo and power. Full Maths (option) support up to 100 character free form math expression for each pen. For example: SINE, COS, TAN, Log, Parenthesis (eg. A1 + A2), comms variables, free memory, and access to any data item variable (A1, P1, D1 etc.).
<b>Front (std) and Rear (option) USB Ports</b>	USB host ports front (std) and rear (option) for data and setup transfers through these ports. External devices keyboard or mouse, Barcode reader, or external mass storage device. (USB 1.1 compliant)
<b>Standard Screens</b>	Fully programmable display values in engineering units. Time & date stamp on every division. Sets of Standard screens are available to display data on a chart, digital reading, bargraphs or numerous combinations thereof. Screen properties can be modified on the recorder and customised to suit. Digital values displayed include alarms on bars, engineering units, pen name, tag, time and date, 20 character description and totalised values.
<b>Data Storage</b>	<p><i>Local Mass Storage Options:</i> USB memory key - up to 2Gb, USB hard drive - up to 120Gb,</p> <p><i>Internal Data Buffer:</i> Non-volatile. 70MB (16 million acquisition values) and 400MB (up to 90 million points)</p> <p><i>Setup and screens:</i> Stored internally on non-volatile memory</p> <p><i>Manual Saving:</i> Data saving by inserting USB memory stick</p> <p><i>Data Saving Period:</i> Related to log rate, number of pens, totals and alarms. Each pen is capable of its own independent storage rate. (200ms to 60 h).</p> <p><i>Data Format:</i> Honeywell binary encoded format</p> <p><i>Recycling Mode:</i> Internal memory has FIFO (First In First Out) capability where the newest data over-writes the oldest data.</p>
<b>Power Requirements</b>	<p><i>Voltage (VRMS):</i> 100VAC to 250VAC (auto select). Frequency: 50/60Hz</p> <p><i>Power Consumption:</i> &lt;40W.</p> <p><i>24V Optional instrument power:</i> 20 to 30VDC/20 to 25VAC. Power Consumption: &lt; 40 watts</p>
<b>Battery</b>	Battery backed up for clock, replaceable lithium battery Type 6032, 3.0V – 10 years life (Recorder powered), 4 years life, typical (Recorder un-powered).
<b>Password Protection</b>	Multiple Administrator control of password setup and management with four levels of password protection for – Engineer, Supervisor, Technician, and Operator. Up to 50 different users are available. Password protection restricts user entry to the recorder set up and specific screens. Engineer – Highest access to all levels, Supervisor, Technician and Operator. Supervisor – 2nd highest level including Technician and Operator access Technician – 3rd level including Operator access Operator – 4th and lowest level of access.
<b>Languages</b>	English UK & US, French, German, Italian, Spanish, Brazilian, Polish, Hungarian, Slovakian, Czech, Turkish, Romanian, Russian and Portuguese.
<b>Temperature Units</b>	°C, °F, °K
<b>Recorder Identification</b>	Status bar: Alternately displays Recorder ID and Recorder Screen Name. Displays Time and Date.

<b>Specification</b>	<b>Design Attributes</b>
<b>Clock</b>	Accuracy: $\pm 29$ ppm ( $\pm 1$ minute/month) @ 25°C. Summer/Winter manual or automatic time adjustment or via communications. SNTP Client and/or Server included for synchronising over Ethernet.
<b>Alarm Set Points</b>	6 per pen integral "soft" alarm set points easily set by user to announce selected out of limit conditions; user can select if an alarm triggers a change in the chart background colour. Alarm triggers can be set for Hi, Lo, Deviation. Latched alarms require acknowledgement from the operator. Alarm Damping - 1 sec to 24 Hours; Hysteresis - +/- 100% of pen scale. An alarm can change the log rate on the affected pen.
<b>Data Replay Mode</b>	Data replay facility on chart displays at normal, fast or slow speeds with zoom and cursor. Jump facility from the alarm history list directly to the occurrence on the chart.
<b>Display Chart Speeds</b>	Chart rates: 1 mm/hour, 5 mm/hour, 10 mm/hour, 20 mm/hour, 30 mm/hour, 60 mm/hour, 120 mm/hour, 600 mm/hour, 1200 mm/hour, 6000 mm/hour. Combinations of rates can be mixed and chart speeds can be set independently for each chart. Display speeds are independent of logging rate
<b>Messages Screen</b>	The message screen displays system information and records any setup activity that has been changed. It also provides warning and error message updates, lists alarm activity and will display user defined marks on a chart.
<b>CE Conformity (CE Mark)</b>	This product conforms with the protection requirements of the following European Council Directives: 73/23/EEC, the Low Voltage Directive, and 89/336/EEC, the EMC Directive. Conformity of this product with any other "CE Mark" Directive(s) shall not be assumed.
<b>Immunity Product Classification</b>	Complies with EN61326 Class I: Cord Connected, Panel Mounted Industrial Control Equipment with protective earthing (grounding). (EN 61010-1)
<b>Enclosure Rating</b>	Front panel designed to NEMA3 / IP54 (Optional NEMA 4X / IP66)
<b>Installation Requirements</b>	Category II: Overvoltage (EN 61010-1) Pollution Degree 2
<b>EMC Standards</b>	Emissions - EN61326 Class A Immunity - EN61326 Industrial Levels
<b>Safety</b>	Complies with EN61010-1: 2001. Panel Mounted Equipment, Terminals must be enclosed within the panel.

<b>Specification</b>	<b>Analogue Inputs</b>
<b>Number of Inputs</b>	3, 6, 9 or 12 input channels
<b>Input Types</b>	mV, V, mA with external shunt (provided as standard), Thermocouple, RTD and ohms
<b>Minimum Input Span</b>	Range is fully configurable with span limitation of the operating range selected with 4% under range to 4% over-range capability (50V Range 2%)
<b>Burnout (T/C)</b>	Active (High or Low), Passive and Health watch/maintenance (option).
<b>Cold Junction Compensation</b>	Internal compensation with the ability to manually adjust values, External Input for compensation, External CJC value specified
<b>Input Resolution</b>	0.0015% (16 Bit ADC)
<b>Input Impedance</b>	Current loop resistance: 10 ohms, use $\pm 0.1\%$ external resistor. Volts $> 1M\Omega$ , all other $> 10M\Omega$
<b>Source Impedance</b>	T/C and RTD: 100 ohms per lead maximum. (A single point cal on Slot A will improve accuracy for a lead resistance above 10 ohms).
<b>Square Root Extraction</b>	Available as standard on Volts and mA input types
<b>Sensor Compensation</b>	Single point and Dual point for every input type

<b>Specification</b>		<b>Analogue Inputs</b>	
<b>Input Sampling Rate</b>	Recorder has 2 available slots with up to 6 analog inputs each; first slot fixed. Analogue Input card (std): 200mS (5Hz), 500mS (2Hz) Analogue Input expansion card (option): 100mS (10Hz), 200mS (5Hz), 500mS (2Hz)		
<b>Scales, Linear &amp; Logarithmic</b>	Normal and Scientific notation Decimal Point automatic or programmable Engineering units, user definable (10 characters) Logarithmic Decade limits: -38 min, to +38 max, (recommend up to 20 decades on one screen to ensure clarity)		
<b>Input Isolation</b>	300VAC channel-to-channel, channel-to-ground. (Resistance thermometers are not isolated for initial card, expansion card option RTs are isolated)		
<b>Noise Rejection (at 50/60Hz) +/-2%</b>	<b>Analogue Input card (std)</b> Common mode: 2Hz = -120dB, 5Hz = -120dB Normal Mode: 2Hz = -80dB, 5Hz = -25dB <b>Analogue Input expansion card (option)</b> Common mode: 2Hz = -120dB, 5Hz = -120dB, 10Hz = -120dB Normal Mode: 2Hz = -85dB, 5Hz = -80dB, 10Hz = -48dB		

<b>Specification</b>		<b>Logging</b>	
<b>Logging Method</b>	Sample, Average, Min/Max - can be set independently per pen		
<b>Logging Types</b>	Continuous, Fuzzy		
<b>Logging Rate</b>	From 100msec. to 60 hours per pen		
<b>Fuzzy Logging</b>	A secure data storage technique which delivers data compression ratio of 100:1 or more; self teaching, storing the data at a variable rate to match the process		

<b>Specification</b>		<b>Physical Parameters</b>	
<b>Enclosure/Bezel</b>	Zinc plated steel case with high impact resistant polycarbonate bezel; scratch resistant lens (Polyethylene Terephthalate). NEMA 3 / IP54 protection rating standard. Optional NEMA 4X / IP66 (Front face only)		
<b>Mounting Panel</b>	Unlimited mounting angle. For the best view of the display the viewing angle should not exceed 45° from the left or right, 10° looking down and 30° looking up at the recorder display. Mounting adjustable for panel thickness of 2mm to 20mm. Adapter kits available for covering existing panel cutouts.		
<b>Dimensions</b>	W: 144mm (5.67"), H: 144mm (5.67"), D: 200mm (7.87"). Additional 80mm (3.15") clearance recommended for a straight type power cable and signal connectors. Cutout 138 x 138mm (5.43 x 5.43")		
<b>Weight</b>	2.4 Kg (5.3lb) max.		
<b>Colour</b>	Bezel: Black		
<b>Wiring Connections</b>	IEC Power Plug. Removable terminal strip for input and alarm connections		

# Input Range Performance and Accuracy

For Analogue Input standard and expansion cards

Input Actuation (Linear)	Range	Accuracy	Temp. Stability +/-	Input Impedance

Reference Temperature: 22°C

Reference Sample Rate: 2Hz (500msec)

Reference Humidity: 65% RH +/-15%

Long term stability: 0.2%/year

\* Does not includes reference junction calibration of  $\pm 1.0$  °C using the standard "ice bath" method of calibration. Factory accuracy can be improved by performing a field calibration. Also does not include any error on the sensor.

\*\* Tolerance for these input types includes that of the external shunt resistors (0.1% tolerance)

Specification	Options
<b>Alarm Outputs (optional)</b>	<p>Programmable alarm set points (6 per pen) can be configured to activate up to 8 outputs. Update rate: 200 ms for all alarms. Number/Type:</p> <ul style="list-style-type: none"> <li>• 4 or 8 relay contacts SPDT, 3A 240VAC, 3A 24VAC/DC, 0.2A 240VDC (non-inductive, internally suppressed)</li> <li>• 8 I/O - SPNO 1A 24VDC (non-inductive, internally suppressed)</li> </ul> <p>Activation: Fully programmable internal alarm levels. Assignable to any relay output.</p>
<b>Digital Input/Output (optional)</b>	<p>8 I/O: all channels may be selected freely as either digital inputs or outputs. Inputs: voltage free, isolated. The Digital I/O card also has 4 channels that can be set as pulse inputs (channels 1 to 4). The operating frequency for pulse inputs on the Digital I/O card is 1kHz max.</p> <p>4 relay outputs: all four channels are relay outputs only.</p> <p>8 relays/ 2 DI card: two outputs can be configured for use as digital inputs: A digital input is provided by a volt free contact between the normally open (NO) and the common (C) terminals of an output relay. If the 2 Digital inputs are used only 6 relay outputs are available. Closed &lt;500 ohms, Open &gt;300 kohms.</p>
<b>Email (optional)</b>	<p>Setup email accounts to send the following: When an Alarm is triggered or an Email can be sent as a part of an Event occurring, such as: Alarms - In/Out/Ack, Totaliser – Start, Stop or Reset, Digital Inputs – On, Off or State change, TC Burnout – on a specific Analogue Input channel, Scheduled Events – Once, Interval, Specific days, Month End.</p>
<b>OPC Server (optional)</b>	<p>OPC 3.0 DA &amp; AE compliant. Totalisers and up to 24 pens can be transmitted via OPC server, max poll rate 1/s.</p>
<b>Events (optional)</b>	<p>User defined process events are recorded and can be set to cause particular recorder actions. Events can consist of recording start/stop, digital inputs, alarms, totalising actions, timers, barcode, etc. Once an event has been caused it can produce a definable set of effects on the recorder which can include, mark on chart, relay outputs, recording control, acknowledge alarm, trigger an Event, set/clear Relay, Screen change, E-mail a message and Reset max/mins. Each event marker can be recorded for analysis using the TrendManager Software Suite.</p>
<b>Health Watch/Maintenance Capability (optional)</b>	<p>The recorder keeps track of important "life actions" for improved diagnostics and preventative maintenance notification. Including Powered On, Last powered On, Time On since power up, Total On time, Total Off time, Longest Off time, Lithium cell life, Backlight life left at 100% brightness, Hi/Lo CJC value (Hi &amp; Lo temps), Analogue In last factory/user cal, Relay operations, last configuration change.</p>
<b>Agency Approval (optional)</b>	<p>CSA (Optional) CSA22.2-No.1010.1-2004 Certificate Number L211230. UL (Optional) ANSI/UL61010-1-2004 File # 201698.</p>
<b>Transmitter Power (optional)</b>	<p>130mA @ 24VDC <math>\pm</math> 3VDC.</p>
<b>Extended Security System (ESS) (optional)</b>	<p>Provides full support for 21 CFR Part 11. Includes features for entry of unique User ID's and associated passwords, timeout on inactivity (1 to 10 min.), password expiration (1 to 365 days), up to 50 users, password re-entry lock out for incorrect entry of password more than 3 times, no re-use of passwords (programmable 4 to 12 times), traceability by user name</p>

Specification	Options
<b>Totaliser/Sterilisation* (optional)</b>	One totaliser per pen. Totaliser value must be assigned to a pen for display and storage. Multiple totalisations (Maths option) are possible with the use of extra pens (option). Reset may be manual or programmed (Event option). Totalisation values are ten digits plus exponent. Each pen can be totalised according to the Fo or Po sterilisation* function at 250 °F (121.11°C). The Standard Reference Temperature and Thermal Resistance (Z Value) are fully adjustable values of X, Y, W and V. Start temp, Reference temp and Z factor are all user defined, allowing support for many different types of sterilisation applications.
<b>Batch (optional)</b>	The Batch function allows the user to segment portions of data for further analysis. Batch controls include Start, Stop, Pause, for viewing, Resume and Abort.
<b>Print Support (optional)</b>	Network printing from status, message and replay screens. Plus screen capture facility of process screens instantly using a basic USB standard PCL printer.
<b>Math Algorithms (optional)</b>	All analog input channels have a math expression text block. This is a fully user programmable 100 character free form math expression for each pen. Math calculations are available on all pens, one per input plus 12 extra pens for the <b>QXe</b> recorder.
<b>Miscellaneous</b>	Optional customer ID Tagging (3 lines of up to 22 characters each line)

\*Specification table for Sterilisation: The definition of Fo/Po is the sterilisation/pasteurisation time in minutes required to destroy a stated number of organisms with a known z at temperature T. For example, "F18/250" represents the time in minutes required to destroy a stated number of organisms at a temperature of 250°F (121.11°C) with a z = 18 degrees F. F values are used to compare the sterilizing values of different processes, however, F values cannot be compared unless the z values are the same. When temperature is not specified (for example, F = 8.6) it is understood that the temperature is 250°F (121.11°C); the subscript O (as in the term Fo = 7.4) is used to indicate that the z = 18 degrees F and the temperature is 250°F (121.11°C)

Specification	Environmental and Operating Conditions			
Parameter	Reference	Rated	Extreme	Transport & Storage
<b>Ambient Temperature</b>	67 °F to 77 °F 19 °C to 25 °C	32 °F to 122 °F 0 °C to 50 °C	32 °F to 122 °F 0 °C to 50 °C	14 °F to 140 °F -10 °C to 60 °C
<b>Relative Humidity (%RH)</b>	50 to 65*	10 to 90*	5 to 90*	5 to 95*
