

## Dräger X-plore® 6570 Full Face Masks

The Dräger X-plore® 6570 is the high comfort silicone full face mask used by professionals in a wide variety of applications. It meets the highest demands for quality, reliability, secure fit and comfort. This full face mask is the successor to the Panorama Nova masks, a range which has proven itself over decades of use worldwide.

The Dräger X-plore® 6570 is compatible with the respiratory filters from Dräger's comprehensive X-plore® Rd40 filter range. This mask covers a wide range of applications and is versatile in use. For applications with unknown contaminants or in oxygen deficient environments, the Dräger X-plore® 6570 can be used in combination with a self-contained breathing apparatus.

The silicone mask body is particularly gentle on the skin and remains extremely flexible at high and low temperatures. Featuring a double-layer face seal with triple sealing action, it ensures a secure and comfortable fit on just about any shape of face. The mask comes in a universal "one size fits all", keeping logistics and storage easy. The comfortable five-point head harness ensures that the mask can be donned easily and quickly, and is wide

enough to prevent any pressure points on the wearer's head.

The distortion-free visor with 180° wide-angle guarantees a large field of vision with panoramic view. It comes in either impact-resistant polycarbonate (with a plastic frame) or chemical-resistant triplex (with an extra robust stainless steel frame). The intelligent ventilation system ensures that the visor remains fog-free, while a stainless steel speech membrane facilitates communication.

A barcode inside the mask makes checking inventories and carrying out mask maintenance easy. Valves can even be serviced without tools. A full range of accessories and spare parts are available. High quality materials and careful workmanship ensure mask longevity, making these masks highly cost effective.

### TECHNICAL DATA

Mask body	Particularly skin-friendly silicone, which is highly flexible at high/low temperatures
Visor	Choice of impact-resistant polycarbonate or extremely temperature- and chemical-resistant triplex
Connector	Sturdy plastic with inhalation and exhalation valve, standard thread connection Rd 40x1/7" as per EN 148-1
Weight	Approx. 520 – 620 g (depending on visor/frame)
Tested and approved	EN 136 Class 3 (CE mark), NIOSH (PC), AS/NZS

ST-7501-2005
